Belgium

Permissions

1. Go to **system** → **Permissions** → **User Roles**.
2. Select the user role you want to grant permission.
3. Go to the tab "Role Resources".
4. Select **CompactCode** → **Card Slider** → **Configuration**.
5. When this is selected, save the role.

Warning: By default, new modules grant access to every user role, even when they are not selected.

To deny permissions, just follow step 1-5. Deselect the mentioned resources and save the role.

Settings

Navigate to settings

1. After logging in to the Magento® backend click the CompactCode icon.
2. Click "Cards List" under the "Card Slider" title.

Creating a card

1. To create a card slide, click the "Add Cart" button on the top right.
2. **Is active:** choose whether or not your card will be active (visible when inserting your widget).
3. **Name:** give a name to your card. Make it a clear name so you can recognize the card.
4. **Title:** the title of your card.
5. **Description:** the description or main content, since this a wysiwyg, you can add certain tags like a header element.
6. **Link title:** the title of your link element.
7. **Link href:** the link you go to when you click in on the link. (to go to another link, rather than adding the href to your url, start with "//").

Insert Card Slider

Navigate to Pages

1. To insert the Card Slider on a page, navigate to the Magento backend and click “content”.
2. Next, click “pages” under the “elements” title.
3. Once you found the page you want to insert the widget in, click the arrow icon right of select and choose edit.

Insert widget and configuration

1. In the content tab, click the “insert widget” button.
2. **Widget type:** select the “CompactCode Cardslider” in the widget type list.
3. **Card Slider Template:** choose the Card Slider Template.
4. **Cards:** select the desired cards for your slider. Once you added the cards you need to “select cards”, you can order them by dragging a card up or down.
5. **Active Cards:** if you want certain cards to be active (effect is different per template), select your active cards.
6. click the “insert widget” button and save your page.
