

Minicart Pro User Guide

CompactCode BVBA
info@compactcode.eu
+32 3 291 13 47
Hellegatstraat 5
2590 Berlaar
Belgium

Permissions

1. Go to **system** → **Permissions** → User **Role**.
2. Select the User Role you want to grant permission.
3. Go to the TAB Role Resources
4. Select **CompactCode** → **Minicart PRO** → **Configuration**
5. When this is selected you can Save Role

Warning: By default, new modules grant access to every user role, even when they are not selected.

To deny permissions, just follow step 1-4. Deselect the mentioned resources and save the role.

Settings

Navigate to settings

1. After logging in to the Magento® backend click the CompactCode icon.
2. Click configuration under the “Minicart Pro” title.

General settings

1. **Module Enable:** enables or Disables the Minicart PRO module.
2. **Minicart fixed Enable:** when enabled, the minicart will be sticky when out of view and rendered on the right side of your page.
3. **Scrolling interval:** defines how long it takes for the minicart icon to become sticky after scrolling down the page (milliseconds).
4. **Transition duration:** the time the animation takes to open your checkout cart block.
5. **Transition timing function:** the transition effect with which your cart block opens.
6. **CSS custom style:** a simple way to add custom CSS to your minicart.

Example:

```
.action.showcart:before{  
    font-size: 2rem;  
}
```

Presets

N °	Group title	Label	Preset	Explanation
